### **DETAILED ACTION**

This Office Action is in response to the Application filed October 12, 2005.

#### ***Election/Restrictions***

1. Applicants' election without traverse of Group II, claims 1-22, in the reply filed on November 6, 2007 is acknowledged. Claims 23-26 are withdrawn from further consideration as being drawn to a nonelected invention.
2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Species I, as shown in Figs. 1 and 3(d).
- b. Species II, as shown in Figs. 4 and 6(d).
- c. Species III, as shown in Fig. 7.
- d. Species IV, as shown in Fig. 8.
- e. Species V, as shown in Fig. 9.
- f. Species VI, as shown in Fig. 10.
- g. Species VII, as shown in Fig. 11.
- h. Species VIII, as shown in Figs. 12, 14(b) and 16(b).
- i. Species IX, as shown in Fig. 17.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1, because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common features as set forth in claim 13 do not show an inventive concept over the prior art as evidenced by Fig. 3A of Ueno (US 5,895,939), which shows all the limitations of claim 13.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAY C. KIM whose telephone number is (571)270-1620. The examiner can normally be reached on 7:30 AM - 5:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
